

Dithiazine

Dithiazine is a key breakdown component of MEA-triazine-based hydrogen sulfide scavenger solutions. Conventional testing involves expensive, complicated laboratory methods that can take weeks to complete. With our simple, easy-to-use system for rapid analyte detection, it is possible to perform on-site, laboratory-grade testing for dithiazine in spent scavenger solutions. The reduction in testing time from weeks to minutes enables better decision making on when to replace scavenger solutions, improving scavenger system performance while reducing material and labor costs. When coupled with our MEA-Triazine and monoethanolamine cartridges, the dithiazine cartridge offers complete analysis of hydrogen sulfide scavenger solutions.

Benefits

- Minimal training needed
- Minutes per test with milliliters of sample
- Directly measure spent scavenger solutions without extensive sample preparation

Specifications

- Accuracy:** ± 100 -ppth
- Range:** 0 to 25% (0-ppth to 250-ppth)
- Count:** 10 cartridges per box

Ordering Information

Product

- Dithiazine Analysis Cartridges
- MEA-Triazine Analysis Cartridges
- MEA Analysis Cartridges

Part Number

- OV-PP-B011
- OV-PP-B010
- OV-PP-B003
